Uploading Building Information

- Navigate to Building Data
- Uploading Building Data

Navigate to Building Data

- Click the **Building Data** button, all the building data collected are displayed in a list.
- Once clicked, displays the Buildings Data list page.

Overview:

- Building data collected by the user are stored on the local device memory. Once the user has internet access, the user can transfer the data to IMIS.
Figure 5-2 Building Data List

- Notice that the Building Identification Number (temporary) and Tax Code of the building are appended on the file name of the building data.
Tools:

Figure 5-3 Building Data Tools

- **Delete**: The user can also delete the recorded data by clicking on the **'****DELETE**' button. A message box will appear, to confirm the delete.
- **View on Map**: The user can also view the outline of the building on the map. The building footprint is displayed on the map.

Overview:

- Once the data has been uploaded, stored data on the local device memory will be removed.

Note:

- If the user tends to upload the Building data in which it has the intersected polygon, then the system will notify with a message as:

Figure: Validation Message of intersected polygon

The user has to delete the intersect polygon data and again collect a new data of the Building polygon by placing each marker on the edge of the building's plinth and upload the data.
