

The timeline illustrates the evolution of the City Wide Inclusive Sanitation Service Assessment And Planning Tool. It begins in 2016 with 'FSM Diagnostics for Service delivery in urban areas', represented by a 'DIAGNOSTICS & DECISION SUPPORT' flowchart. This leads to 2017, featuring a 'Shit Flow Diagram (SFD)' and the 'FSM Toolbox' logo. The timeline continues to 2019, marked by the 'City Service Delivery Assessment (CSDA)' which includes tables for 'Sewered sanitation' and 'Non-sewered sanitation'. Finally, it reaches 'Till now', showcasing the 'CWIS SAP' tool, the 'Nepal WASH MIS' logo, and the 'IMIS' (Integrated Management Information System) map interface.
