

Sustainable Development Goals

Sustainable Development Goals

- The SDGs are a logical follow-up to the Millennium Development Goals (MDGs).
- The MDGs were implemented between 2001 and 2015 and were a global compact with thematically specific, time-bound, monitorable and quantified targets.
- While building on the MDGs, the SDGs expand both the scope and comprehensiveness of the goals and targets.
- The SDGs define 17 goals and 169 targets to attain those goals, and 232 indicators to measure the achievement of targets.
